

BRUNO PINHEIRO

Senior Product Designer | Design Engineer

Irish/EU Citizen | hello@brunopinheiro.eu | brunopinheiro.eu | linkedin.com/in/brunopinheiroeu

Summary

I turn ambiguous problems into working digital products. Over 25 years, I have rebuilt legacy platforms, designed product systems, automated repetitive workflows, and shipped 0-to-1 tools with AI-assisted coding. I work best where product strategy, UX, and technical execution need to live in the same person.

Experience

Lead Product Designer

The Educational Company of Ireland (Edco), Remote | May 2022 to Present

Ireland's leading educational platform, 50,000+ students across web and mobile

- Led Flash-to-HTML5 migration, increasing monthly delivery from **30 to 100 products** while cutting developer hours by **50%** through process optimisation
- Redesigned the main learning platform using a component-based design system, expanding usable screen space by **11%** and improving focus and engagement for **50,000+** students
- Built and scaled a unified design system adopted across **3,500+** products, enabling faster handoffs and consistent user experience
- Developed Python and Shell automation scripts to eliminate repetitive tasks, enabling async collaboration and accelerating team productivity
- Translated stakeholder needs into clear product and technical direction, and made engineering constraints understandable to non-technical teams while shipping workflows, prototypes, and automation tools

Founder and Design Engineer

Brunix Studio, Remote | Nov 2024 to Present

Independent studio building AI-assisted products, internal tools, and workflow automations from concept to deployment

- Built AI-assisted mobile, web, and internal products from 0 to 1, taking them through user tests, live pilots, team adoption, and Android launch prep
- Designed and deployed MVPs with Codex, Claude Code, Lovable, React/Next.js, React Native, Vercel, Supabase, and Neon
- Created Edco/Bua automation tools that cut resource-production tasks by 10x+, turning PDF, thumbnail, title, and SVG workflows from hours into seconds

Product Designer, Contract

Imvizar, Dublin, Ireland | Jan 2022 to May 2022

- Led end-to-end redesign of mobile and web platform plus complete visual identity overhaul, directly contributing to the company securing new partnerships and investment
- Built foundational design system still scaling across the product today

Founder and Product Leader

Wave VR Studio, Brazil | Jun 2014 to Aug 2017

- Founded and led VR startup building architectural visualisation and tourism platforms in Unity 3D and Unreal Engine, securing incubation at InovAtiva Brasil
- Pivoted from B2C to B2B based on user research, resulting in partnerships with real estate developers and tourism boards

Earlier: Product Designer at McGowans Print, Ireland (2018-2021) | Motion Designer at Therapie Clinic, Ireland (2021) | Frontend Developer, 3D Artist, eLearning Designer in Brazil (2002-2014)

Skills

Product: Discovery, MVP scoping, UX strategy, user testing, product delivery

Technical: Python, Shell, Git, HTML/CSS/JS, React, React Native, Next.js, Figma

AI and Automation: Codex, Claude Code, Lovable, Cursor, OpenAI API, n8n, Supabase, Neon, Vercel

Education

AI Product Management Certification | 2025

Maven, Product Academy, Remote

UX Bootcamp | 2019-2020

Talent Garden Innovation School, Ireland

MBA in Entrepreneurial Management and Innovation | 2016-2017

Universidade Federal de Campina Grande, Brazil

BSc in Graphic Design | 2002-2005

Universidade Tiradentes, Brazil

Languages: Native Portuguese | Fluent English | B1 Spanish
